TRUCK CLASSIFICATION GUIDE

Based on Gross Vehicle Weight of Truck (GVW)

CATEGORY	GVW CLASS	GROSS VEHICLE WEIGHT RANGE-
Light	1	Up to 6,000 lbs GVW
Light	2	6,001 – 10,000 lbs GVW
Medium	3	10,001 – 14,000 lbs GVW
Medium	4	14,001 – 16,000 lbs GVW
Medium	5	16,001 – 19,500 lbs GVW
Medium	6	19,501 – 26,000 lbs GVW
Heavy	7	26,001 – 33,000 lbs GVW
Heavy	8	33,001 lbs and up GVW

WELDING TIPS

① OXYACETYLENE WELDING

Filler Metal: Use a mild steel filler, $\frac{3}{32}$ " diameter, free of rust. (American Welding Society classification A5.2) **DO NOT** use copper coated filler metal.

Welding Equipment: Use a number 3 or 4 tip. Observe instructions of the equipment manufacturer when adjusting the operating pressures at the gas regulators.

Procedure: Clean the parts to be welded thoroughly. Incline the torch at a 45° angle away from the direction of travel. Use the forehand welding technique. Keep the torch flame on the tip of the filler rod, not in the center of the puddle.

② SHIELDED METAL-ARC

(STICK ELECTRODE)

Any one of the following rods are recommended: Raco Fer-Al (Reid-Avery Co.), E-6011 (P. & H.), Fleetwood 47 (Lincoln), W-52 (General Electric), Flex-Arc LOH-2 (Westinghouse), Stainless Steel Rods Type 309 or 310 and Low Hydrogen Rods E-7015, E-7016 or E-7018.

③ GAS METAL-ARC (MIG)

Carbon dioxide shielding gas is used with A-675 Airco Wire.

PRODUCT WARRANTY

HEAVY DUTY EXHAUST PRODUCTS	LENGTH OF WARRANTY
Diesel Mufflers, Vertical Installations	4 Years or 500,000 miles
Diesel Mufflers, Horizontal Installations	3 Years or 500,000 miles
Gas Mufflers	1 Year
Accessories	1 Year
Chrome Parts (Peeling & Blistering Only)	90 Days

TERMS & CONDITIONS

Warranty coverage begins on the date and mileage the part is purchased by the user and expires when the specified number of years or miles has passed, whichever occurs first.

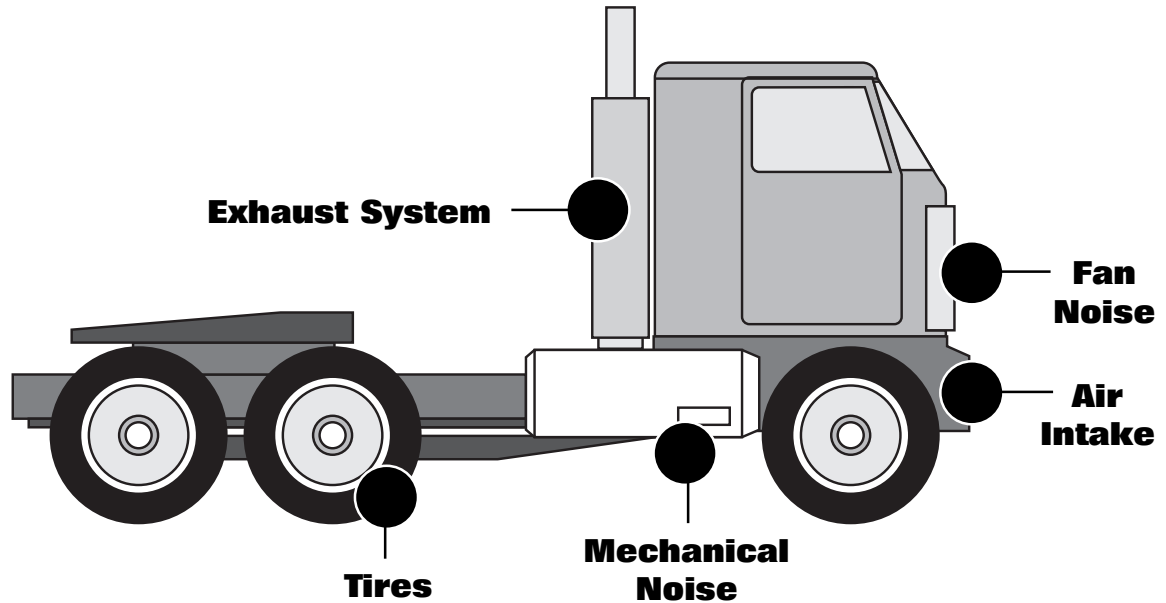

The Length of Warranty for replacement parts provided under Warranty coverage is the balance of the Warranty period remaining on the part being replaced.

WARRANTY STATEMENT

TruckEx™ warrants its products against failure due to defects in materials and workmanship for the period specified under Terms and Conditions for the particular part. TruckEx's obligation under this warranty covers replacement of the failed part including transportation charges. If the TruckEx product failure is the sole and direct cause of damage to the equipment on which the product was installed, TruckEx will reimburse reasonable costs to restore the equipment to the condition it was in immediately before the failure.

This warranty does not cover failure due to misapplication, misuse, abuse, neglect, rust through and corrosion (muffler), improper service practices or non-approved modification. This warranty gives you specific legal rights. You may have other rights which may vary from state to state. Engine and Equipment Manufacturers warranties remain in effect when TruckEx products are used. TruckEx must be notified of any claims covered by this warranty within one year of the date of failure.

5 MAJOR SOURCES OF NOISE IN TRUCKS

U.S. EPA NOISE REGULATIONS FOR ON ROAD TRUCKS

The first nationwide regulation of truck noise was established with the Noise Control Act of 1972 (P.L. 92-574.86 STAT. 1234). Regulations apply to trucks greater than 10,000 lbs GVW. Noise regulations apply to total truck noise, not just exhaust noise. The five major sources of noise in trucks are:

- | | | |
|--------------|---------------|--|
| 1. Fan Noise | 2. Air Intake | 3. Mechanical Noise (Engine & Drive Train) |
| 4. Tires | 5. Exhaust | |

TWICE THE LOUDNESS IS 10dB INCREASE

The increases are not linear! Increasing noise by 10dB sounds twice as loud.

NOISE REDUCTION TIPS

- ❶ Make sure your muffler is recommended by the muffler manufacturer for the particular engine in your vehicle. To meet most new noise laws, the "universal" muffler must be replaced by a muffler designed specifically for the engine.
- ❷ Tail pipes on horizontal exhaust systems should be tipped toward the center of the vehicle to avoid noise reflection off the road.
- ❸ If you have curved stacks, replace them with straight stacks. Noise coming from a pipe outlet is directional and straight stacks will throw noise up, not to the side. Rain stacks and 45° cut stacks do not appreciably affect noise levels.
- ❹ The length of stack installed on the muffler can be critical. If an irritating "rap" is heard at certain engine speeds, try stacks with different lengths.
- ❺ In an exhaust system with piping exceeding 10 feet in length, the muffler is suggested to be installed where the exhaust pipe to the muffler is either one-half or four times the length of the tail pipe.
- ❻ A resonator can be used in-line with the recommended muffler for additional noise reduction.
- ❼ If you have increased the size of the exhaust piping or made a dual out of a single system, check recommendations for piping size. Over-sized systems are exceedingly noisy!
- ❽ The vehicle operator, to a certain extent can control his vehicle noise. The greater the engine load the louder the noise. Certain engine speeds may be more noisy than others. High vehicle speed causes more tire noise. Operating an engine brake when it's not needed may cause extra noise.
- ❾ If the above-mentioned techniques do not solve your problem, contact TruckEx for specific recommendations.

MAINTENANCE TIPS

- ❶ Check flex tubing regularly. Repair worn or leaking tubing.
- ❷ Make sure the exhaust system is properly supported with required brackets, clamps and braces.
- ❸ Check strap seal band clamps to ensure properly tightened to avoid leaks.
- ❹ Consider accoustic compound when repairing OD-ID connections.

AFTER MARKET REGULATIONS FOR TOTAL TRUCK NOISE

US EPA regulations stipulate maximum noise levels for both new (first-fit) and in-use trucks. Vehicle manufacturers are responsible for compliance of new trucks, and owners are responsible for in-use trucks. New trucks must be no louder than 80 dB at 50 feet. In-use trucks,

if manufactured 1986 or later, must be less than 83 dB. If they were manufactured before 1986, they must be no louder than 86 dB. EPA regulations also stipulate that a replacement muffler be no louder than the original equipment (first-fit) muffler.

EXHAUST PRODUCT MATERIALS

There are a number of materials used in heavy duty exhaust applications. Some of the materials are appropriate for heavy duty applications. Other choices are not durable at the temperatures generated by gas and diesel engines and should be avoided if acceptable service life is desired. Materials selected must not only survive high temperatures, but also severe vibration, corrosive exhaust gasses, and external corroding agents such as salt and water.

The materials generally considered for exhaust parts are as follows:

- Aluminized Steel
- 400 Series Stainless Steel
- 400 Series Aluminized Stainless Steel
- 300 Series Stainless Steel
- Galvanized Steel
- Low Carbon Cold Rolled Steel (CRS)

Aluminized Steel is the preferred material for most heavy duty diesel applications. Aluminized Steel is a low carbon steel with a thin layer of aluminum alloyed to the surface. The aluminum provides galvanic protection for the base material. Aluminized Steel parts have an ultimate service temperature of 1250° F with a continuous duty temperature of 1100° F. This material has excellent corrosion resistance to acidic diesel exhaust gasses. Aluminized Steel parts provide excellent field life at a reasonable cost.

400 Series Steels are used for extended service life in diesel applications, and often in gas applications due to their higher operating temperatures. This material family provides slightly better strength at exhaust system temperatures than aluminized steel.

The most common 400 Series Steel used in exhaust applications is Type 409. It is stronger than aluminized but has cosmetic problems at exhaust system temperature. At first exposure to high temperature it discolors. Over time it develops a nondestructive coating of surface rust. After an extended time in the field a 409 product will display external discoloration and look worse than a similar aluminized part. Parts made with type 409 generally require some type of paint or other coating to slightly delay the onset of external discoloration, and the parts will hold a magnet due to higher iron content.

Another choice is 409 Stainless Steel with an aluminum coating. Aluminized 409 is used on Diesel Catalytic Converter mufflers due to its excellent high temperature resistance and the corrosion protection of the aluminized coating. This is a premium material found

primarily on emission products or high temperature gas applications.

300 Series Stainless Steels are also applied in exhaust systems. The most common material is Type 304. This material has excellent corrosion resistance and very good high temperature strength and is used in some muffler applications where very high stresses occur. It is also used as a premium material for gas applications. The most prevalent use of the material in diesel heavy duty applications is for flex pipe. Flex pipe produced from light gauge 304 Stainless Steel is an excellent choice considering all the factors of cost, durability, and service life. In general field service life with stainless steel flex pipe is very good if the flex tubing is installed properly.

Often **Chrome Plated Cold Rolled Steel** parts are found on exhaust system parts. This material is a reasonable choice when a bright mirror finish is desired. Corrosion from the inside of the product can still occur, Chrome parts are very challenging to produce. It is important to produce the parts with a high level of quality because surface irregularities (and field damage to the surface) will lead to external rust. An alternate choice for chrome parts is **Bright Annealed Stainless Steel**. This material provides a bright mirror like finish with excellent exhaust service life. The material is costly, but part of the cost increase is offset by using lighter gauges.

Galvanized Steel parts are sometimes used in the exhaust market. Galvanized Steel has very poor field performance. This material has an upper temperature limit of approximately 600° F. At temperatures greater than 600° F the material rapidly corrodes with a resulting degradation in appearance and probable failure. Galvanized Steel is often used for flex pipe as a low cost replacement part. The initial low cost is offset by the limited field life of the product.

Cold Rolled Steel (CRS) is a very poor choice for any exhaust system part. This material is extremely susceptible to corrosion. These parts are only used when the lowest possible cost is desired. It is rare to find mufflers made of cold rolled steel, but there are stacks offered in some markets in Cold Rolled Steel. Clamps are another product commonly produced out of Cold Rolled Steel. Clamps are not exposed to the corrosive acids found in exhaust gasses but the high temperatures cause clamps to degrade rapidly in appearance and in function. Cold Rolled Steel clamps can be very difficult to remove after a short time in the field.

TRUCK MODEL IDENTIFICATION INDEX

Medium Duty trucks are 1-2 ½ ton load capacity vehicles with a GVW rating of 10,001 to 26,000 pounds.
Examples: school buses, delivery trucks, motor homes.

Heavy Duty trucks are 2 ½ ton and over load capacity vehicles with a GVW rating of 26,001 pounds and over.
Example: semi tractors, cement trucks, fire trucks.

CHEVROLET/GMC LIGHT DUTY (See Automotive Exhaust Catalog)

HOW TO IDENTIFY "H5D" EMISSIONS

On "C", "R" and "K", "V" Models, this identification sticker is attached to the inner surface of the glove compartment door OR on the left front inner fender skirt. On "P" Models, the sticker is mailed separately to the dealer. On "G" Models, the sticker is located on the inner hood panel surface.

INSTALLATION GUIDE

INSTALLING WYE CONNECTOR

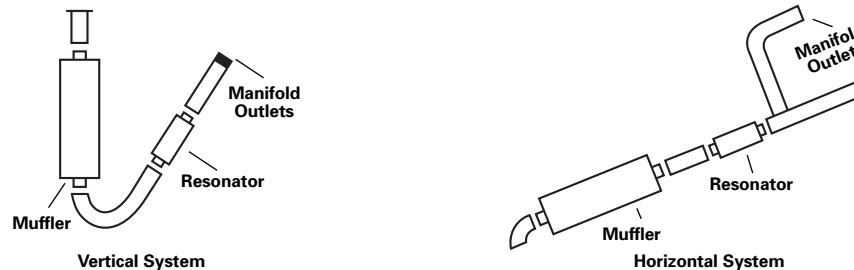

Wye connectors provide an easy and economical way to join the left and right hand exhaust pipes of V-6 and V-8 diesel engines to form a single exhaust. A wye connector system will have an exhaust noise level 3 to 7 dB lower than a conventional Y-pipe system. Wye connectors are pictured and described in the accessory section of the catalog.

Wye connectors are installed as original equipment on some trucks, and they can be custom installed on many V-6 and V-8 trucks with conventional Y-pipes, as shown below:

INSTALLING UNIVERSAL RESONATOR

The universal resonators are shown in the accessory section of the catalog. When properly installed in the center of the exhaust pipe, resonators can generally reduce the exhaust noise level 2 to 3 dB.

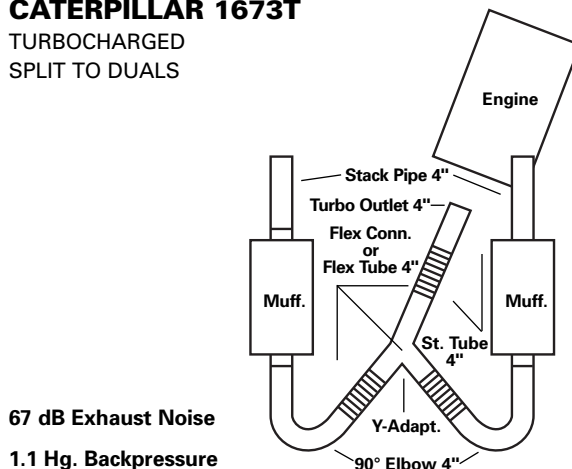

TYPICAL INSTALLATIONS ON DIESEL ENGINES

GENERAL POINTS

- 1) Length and diameter of straight tubing and flex tubing are dependent upon: cab size, wheel base, configuration and muffler placement.
- 2) Exhaust system parts are stated by name rather than by part number, because selection of the correct part depends upon variations in system configuration.

FLEX TUBING

HOW TO ORDER

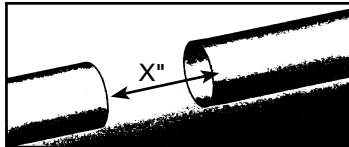

Determine your usage needs. Flex pipe is sold in a variety of lengths including precut lengths. All lengths range from 1" to 6" in diameter. Refer to the chart on the pages 24 - 25 to determine your desired part number.

Order by the part number, not by the foot.

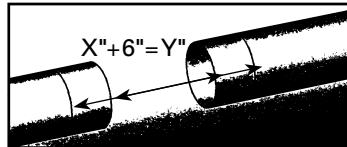

HOW TO MEASURE

When you are ready to put Flex Pipe to use, follow these instructions for determining length to cut the Flex pipe.

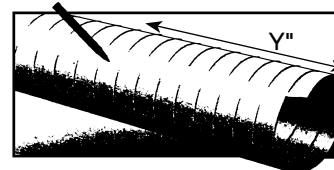

Note: All flexible metal tubing is measured fully extended.

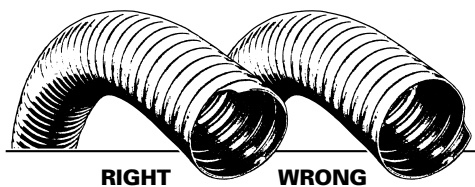

Determine the length (x") of pipe needed for your application by measuring the gap between the two pipes you wish to connect.

Allow a 3" overlap for each end (add 6" to the original measurement) This is the length (y") of Flex Pipe needed.

Measure distance needed from the far right side inward. Wrap area to be cut with duct tape. Use a marker to draw a cut guide on the tape. Flex Pipe is now ready to be cut. Cut through the tape. Remove tape from Flex Pipe before using.

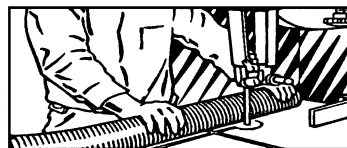

IMPORTANT: When **Measuring & Cutting**, keep the open side of the Flex Pipe to your right. To determine the open end, turn the end of the pipe toward you and look for the rings to wrap **ON TOP** of each other.

HOW TO CUT

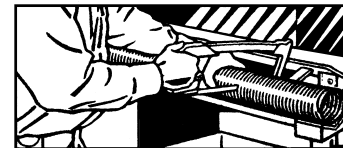

There are three ways to cut Flex Pipe. Select one that suits your equipment.

CHOP SAW: For best results use 1/16" wide blade. Make sure Flex Pipe has the open side to the right. Align and secure pipe so cut guide lines up with Chop Saw blade, and cut.

BAND SAW: For best results use a no-set blade with 24-32 teeth/inch. Make sure Flex Pipe has the open side to the right. Align and secure pipe so cut guide lines up with band saw blade, and cut.

HACK SAW: For best results use a no-set blade with 24-32 teeth/inch. Make sure Flex Pipe has the open side to the right. Align and secure pipe and cut on guide line.

EXHAUST BACK PRESSURE TESTER

Part No. B1

(Dial-Type Gauge)

Testers offer a quick and easy way to diagnose plugged or restricted exhaust systems without cutting or disconnecting pipes.

Part No. B1A

(100 Count)

Hole plugs for B1 Tester

(Shown with B1 image)

MUFFLER CEMENT

Part No. T26-6oz.

Part No. T27-16oz.

This high-performance muffler cement applies like putty but dries metal hard. Available in cases of 12 only.

PIPE EXPANDERS/SHAPERS

Part No.

CLV257 – (1 3/8" to 2 7/16" Dia.)

CLV258 – (to 2 1/8" to 3 7/8" Dia.)

CLV350 – (to 3 1/2" Dia.)

CLV400 – (to 4" Dia.)

CLV500 – (to 5" Dia.)

CLV657 – (1 1/8" to 1 3/4" Dia.)

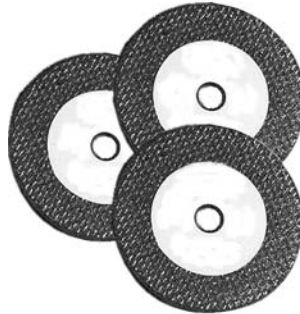

MINI-SAW CUTTING BLADES

Part No. UP1150

(Three replacement cutting wheels)

PIPE END SHAPER TOOLS

Part No. L32000 – (1 ½" to 2 ½" Dia.)

Part No. 9741 – (2 ¾" to 4 ½" Dia.)

PIPE CUTTER

Part No. L31500

This proven pipe cutter handles 1 ¾" to 3 ½" pipes. A one-third revolution cuts a full 360 degrees.

Part No. L31530

Replacement blades for L31500 Pipe Cutter.

Part No. 9742

– (3 ½" to 6" Dia.)
Chain type pipe cutter handles the big diameters.

Part No. 9780

– (2 ½" to 5" Dia.)

Part No. 9781 – (4" to 6 ½" Dia.)

Standard tube cutter & wheel style.

Part No. 9784

– (Wheel)
Replacement components for tube style cutters.

PIPE HOOKS

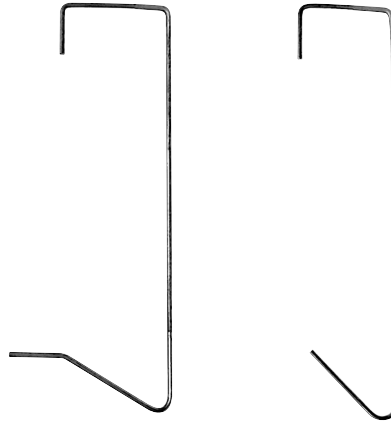

Part No.

FPH51 – (1 ½" to 2 ½" Dia.)
Foreign car pipe hooks.

PH450 – (2 ¾" to 4" Dia.)
H.D. pipe hooks.

PH50 – (1 ½" to 2 ½" Dia.)
Pipe hooks.

PH550 – (5" to 6" Dia.)
H.D. pipe hooks.

GENERAL SERVICE MUFFLER SPECIFICATIONS

STYLE 1 - CENTER TO CENTER

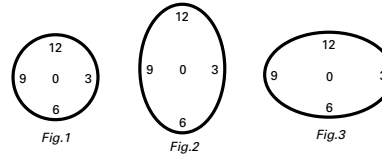

* NPT: National Pipe Thread;
1 Engine Brake Silencer Single

2 Engine Brake Silencer Duals
Engine Brake Silencers perform by using a combination of absorptive and reactive silence techniques that are used to produce a more pleasant sound to the human ear. Using sound analysis, TruckEx has been able to reduce medium and high frequency noise levels and smooth out the sound spectrum eliminating the harsh staccato "bark" of an engine break.

ORIGINAL EQUIPMENT vs ECONOMY

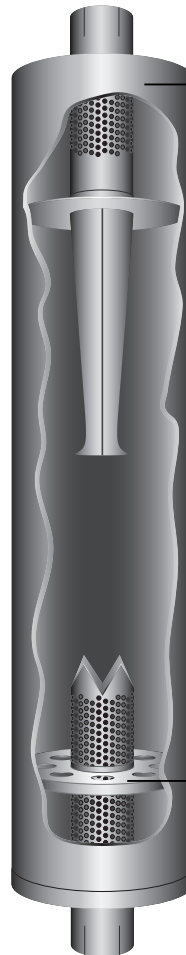

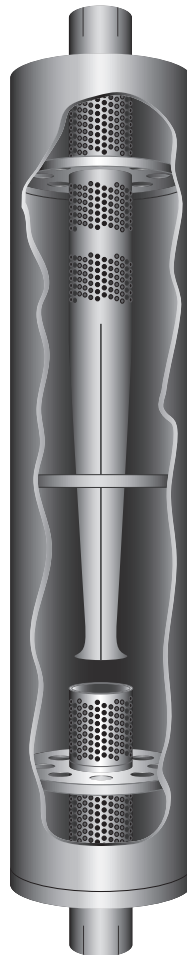

MUFFLER OPTIONS

O.E.

ECONOMY

Original Equipment mufflers reduce exhaust noise to level required to meet EPA truck noise limits.

Original Equipment mufflers can be quieter (Up to 3 dba) than economy versions, depending on make of engine.

16 Gauge End Flange
(Some competitors are lighter).

Local noise laws should be checked before using Economy version.

Internal support flange
(Some competitors do not).

CATALYTIC CONVERTER MUFFLERS

Certified to Meet EPA Requirements

TruckEx converter mufflers are engineered to enable mid-range engines to meet emission requirements of the EPA's Diesel Emissions Standards. The catalytic core within the muffler reduces gaseous hydrocarbons, carbon monoxide, and particulates, while at the same time reducing exhaust noise to 67-72 dBA at 50 feet per the EPA drive-by noise test (levels will vary depending on system configuration).

- Same package size as equivalent mufflers
- Only 10 to 15 pounds heavier than equivalent mufflers
- 409 Stainless steel
- Internal design for even exhaust flow distribution

♣ Refer to charts on following pages to determine muffler style.

606000 SERIES SUPER DUTY UNIVERSAL CONVERTERS

The **606*** Series Universal Converter** is an extra large capacity, without air tube, 2-way or 3-way converter.

Easy to read emissions ratings for both the EPA and CARB. The **606*** SERIES** is designed to fit light and medium duty trucks to 12,000 lbs., G.V.W.-EPA Rating, 11,620 lbs., CARB Rating.

High quality, stainless steel shell and end bushings will provide years of worry free service.

Insure maximum engine capacities and maximum test weight capacities for both the EPA and CARB standards and dimensional information for the **606*** Series Universal Converters**.

606000 SERIES HEAVY DUTY - WITHOUT AIR

Can be used as a 2-way converter on vehicles where the engine size is 7.5L or smaller and with a test weight of 9,000 lbs. or less or as a 3-way where the engine size is 7.5L or smaller and a test weight of 9,000 lbs. or less. G.V.W. of 12,500 lbs. approx., or less.

In California, can be used as a 2-way converter on vehicles where the engine size is 7.4L or smaller and with a test weight of 9,000 lbs. or less or a 3-way where the engine size is 7.4L or smaller and a test weight of 9,000 lbs. or less G.V.W. of 11,620 lbs., or less.

2-WAY OR 3-WAY CONVERTER

SUPER DUTY CONFIGURATION

Converter Type	EPA Engine Size	EPA Test Weight	CARB Engine Size	CARB Test Weight
2-Way	460/7.5L	9,000 lbs.	454/7.4L	9,000 lbs.
3-Way	460/7.5L	9,000 lbs.	454/7.4L	9,000 lbs.

2-WAY OR 3-WAY

607000 SERIES SUPER DUTY UNIVERSAL CONVERTERS

The **607*** Series Universal Converter** is a extra large capacity, with air tube, 2-way, 3-way or 3-way with air converter.

Easy to read emissions ratings for both the EPA and CARB. The **607*** Series** is designed to fit light and medium duty trucks to 12,000 lbs., G.V.W.-EPA Rating, 11,620 lbs., CARB RATING.

High quality, stainless steel shell and end bushings will provide years of worry free service.

Insure maximum engine capacities and maximum test weight capacities for both the EPA and CARB standards and dimensional information for the **607*** Series Universal Converters**.

 69-78 8 Cyl. C50, C60, C65, M50, M60 w/ 366, 427 C.I.D.
 1969 8 Cyl. Series 6500 Tandem w/ 366, 427 C.I.D.

(200147)

FOOTNOTES:

[1] Original equipment system was welded assembly. It is recommended that all noted parts [1] to be replaced.

[3] Required for installation.

[5] Cut at inlet to match O.E. pipe.

[22] O.E. exhaust pipe was one piece. Replacement is two pieces.

[26] It is necessary to replace all parts together on models with spherical ball connections.

[27] Use muffler with adapter 9524 and flange 9569 when mating with an exhaust pipe having spherical ball connections.

[65] Heat Shield 9206 is required for installation.

[67] Can also use combination 2923 muffler (H212 inlet) with 480930 exhaust pipe.

[71] If replacing O.E. exhaust system, first cut tail pipe on vehicle immediately behind converter to tail pipe weld. Cut through outer pipe only, leaving converter nipple intact.

[93] Locating clip must be knocked off converter outlet for proper installation.

[98] Refer to Current Converter Catalog.

[240] See page 63.

[928] To 12,500 lbs. GVW-EPA; 11,620 lbs. GVW-CARB.

• Golden warehouse item.

Air Tube Attachment Kit 4948 may be required to complete installation.

MOTOR HOME

FORD

93-96 8 Cyl. F450 Motor Home Stripped Chassis (F53) w/ 460 C.I.D. (7.5L) Engine; (200292)
(Tail Pipe Exit Front of LH Axle)

93-96 8 Cyl. F450 Motor Home Stripped Chassis (F53) w/ 460 C.I.D. (7.5L) Engine; (200293)
(Tail Pipe Exit Rear of RH Axle)

FOOTNOTES:
[1] Original equipment system was welded assembly. It is recommended that all noted parts [1] to be replaced.
[3] Required for installation.
[12] Optional Heavy Duty Muffler.
[15] See page 25 for flex options.
[17] Separate tail pipe is included in carton with muffler.
[18] Without windshield.
[32] Remove and reuse O.E. heat shield, If required.
[98] Refer to Current Converter Catalog.
[346] For an explanation on model 81 Cab see page 12.
[914] Direct fit converter includes front (exhaust) pipe, (1) piece assembly.
[928] To 12,500 lbs. GVW-EPA; 11,620 lbs. GVW-CARB.
● Golden warehouse item.
* New items

FOOTNOTES:

[1] Original equipment system was welded assembly. It is recommended that all noted parts [1] to be replaced.

[3] Required for installation.

[12] Optional Heavy Duty Muffler.

[15] See page 25 for flex options.

[17] Separate tail pipe is included in carton with muffler.

[18] Without windshield.

[32] Remove and reuse O.E. heat shield, If required.

[98] Refer to Current Converter Catalog.

[346] For an explanation on model 81 Cab see page 12.

[914] Direct fit converter includes front (exhaust) pipe, (1) piece assembly.

[928] To 12,500 lbs. GVW-EPA; 11,620 lbs. GVW-CARB.

● Golden warehouse item.

FOOTNOTES:

- [1] Original equipment system was welded assembly. It is recommended that all noted parts [1] to be replaced.
- [71] If replacing O.E. exhaust system, first cut tail pipe on vehicle immediately behind converter to tail pipe weld. Cut through outer pipe only, leaving converter nipple intact.
- [93] Locating clip must be knocked off converter outlet for proper installation.
- [98] Refer to Current Catalog Converter.
- [128] Adapter(s) may be required to complete installation.
- [928] To 12,500 lbs. GVW-EPA; 11,620 lbs. GVW-CARB.
- Golden warehouse item.

(200472)

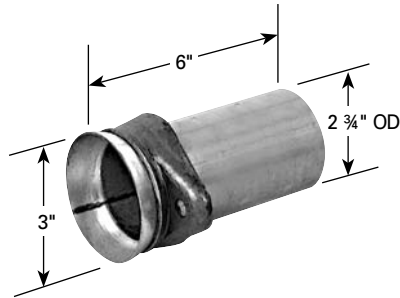

FOOTNOTES:

[128] Adapter(s) may be required to complete installation.

- Golden warehouse item.

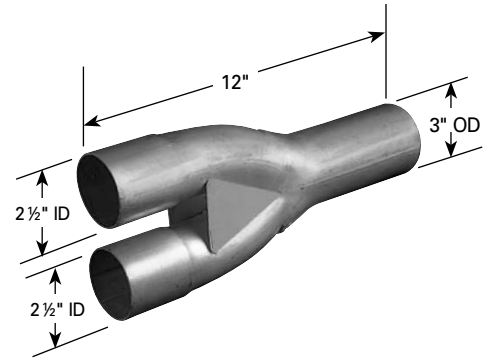

SCHOOL BUS ADAPTERS

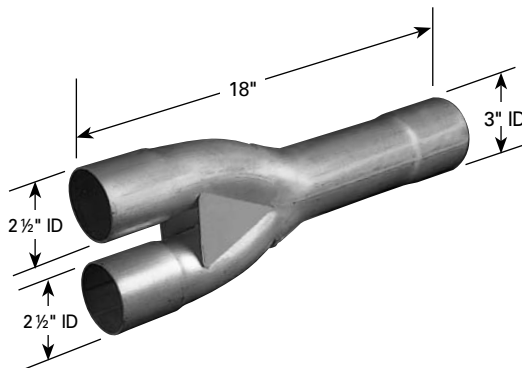

ADAPTER 9524 (TUBE)
(FLANGE 9569 IS SEPARATE)

Socket used to mate GM Y pipes with Ball Connections to 3613 GM muffler.

"Y" ADAPTER 92682

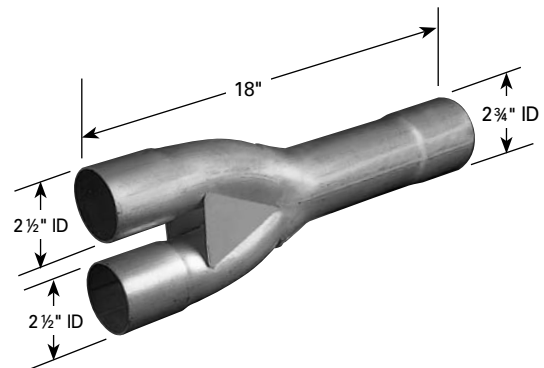

Y Adapter to convert I.H.C. 2 1/2" dual inlet muffler applications to a single inlet muffler. Use in conjunction with muffler **2704**. Can also be used with ID/OD straight tubing to relocate muffler behind rear wheels.

"Y" ADAPTER 92683

Used to convert "S" Series International trucks equipped with gasoline engines and dual inlet mufflers to a single inlet muffler. Single inlet muffler **2704** may be used with 345 & 392 applications (cut off expanded end of "Y" adapter).

Also used to relocate the muffler to a cooler position further back in the exhaust system. Single inlet muffler **2704** may be used with 345 & 392 applications.

"Y" ADAPTER 92684

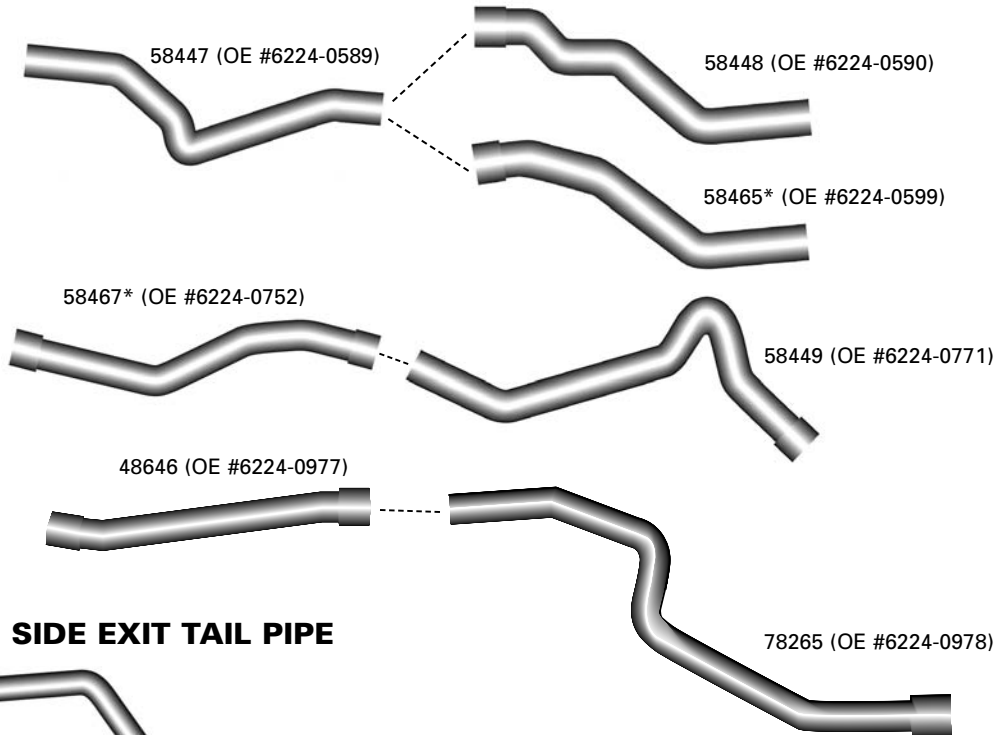

Used to convert late model, dual inlet muffler equipped Ford gasoline engine school buses to single inlet muffler. Single inlet muffler **3613** may be used (cut off expanded outlet end of "Y" adapter).

Also used to relocate the muffler to a cooler position further back in the exhaust system. Single inlet muffler **3613** may be used.

UNIVERSAL OVER AXLE PIPES

TWO-PIECE UNIVERSAL OVER AXLE PIPES

Cut rear pipe to proper length, insert into flared front pipe and clamp.

NOTE: on some installations a section of straight pipe may be required for proper clearance.

FOLLOW THESE INSTALLATION TIPS:

- Use two pipes of the same part number.
- Cut inlet end of rear pipe to give needed clearance and fit (See diagram).
- Join pipes together and secure with clamp.

The over axle pipe is best for school bus fleets. Four part numbers provide excellent coverage for most buses in operation.

One installation takes two over axle pipes of the same number. Less storage space.

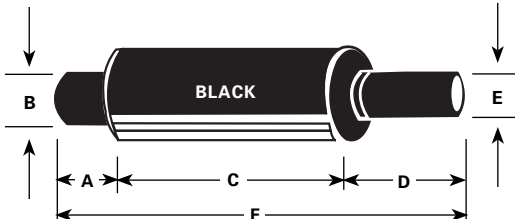

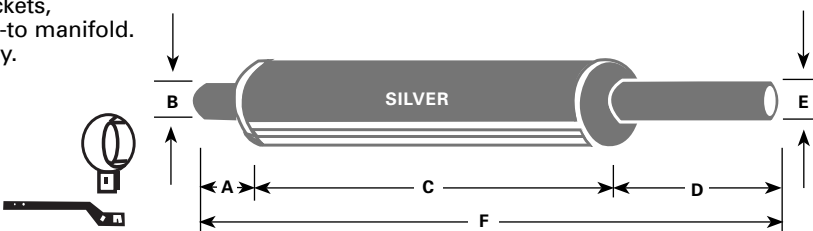

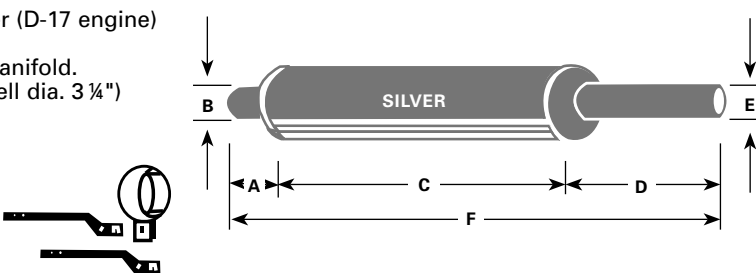

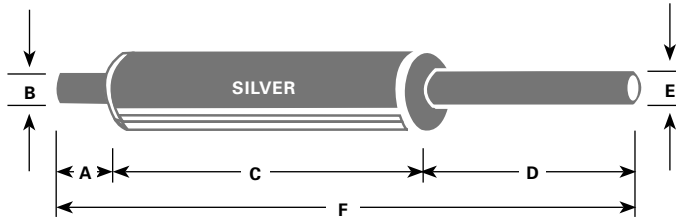

By angling or rotating pipes (before you draw down clamps) you can avoid many under body obstacles (shocks, etc.). Easier installation. Also applicable to vans and other long wheel base trucks.
